

## Medium Resource Worksheet & Feedback - Group 1

**Q1. What benefits and barriers might be associated with screening caregivers?**

---

---

---

---

---

---

---

---

**Q2. What aspects of care-givers' experience should be screened for and what kinds of help offered?**

---

---

---

---

---

---

---

---

## Worksheet & Feedback - Group 2

**Q1. Desire for help does not always reflect 'objectively' measured need. What might underlie this discrepancy?**

---

---

---

---

---

---

---

---

**Q2. What steps could be considered for patients with objective need who do not request help?**

---

---

---

---

---

---

---

---

## Worksheet & Feedback - Group 3

**Q1. What are the knowledge gaps in screening? Which gaps would need to be closed to help you implement screening in your setting?**

---

---

---

---

---

---

---

---

---

---

**Q2. Although there are processes for obtaining research funds, this is often not the case for clinical implementation. What possibilities could be explored in attracting funding & support to clinical implementation of screening?**

---

---

---

---

---

---

---

---

---
